

Delivering better patient care through technology

Transforming fixed, mobile, voice and data networks with services designed specifically for NHS organisations. Simplify your communications, make workers mobile, reduce your costs. And deliver better patient care.

O₂ health solutions are designed to help NHS organisations become more efficient and effective while reducing costs. We bring together all your networks: fixed, mobile, voice and data, so everything flows where it needs to go.

The simpler your network, the better it supports your organisation. We can help you to:

- Enable clinicians, nurses and carers to work flexibly and remotely using fast, reliable data connections.
- Keep your employees in touch, work more collaboratively and save costs by consolidating voice and mobile networks.
- Make your communications easier to manage by moving to IP-based networks.
- Spend more time on patients and less on admin with a single supplier.

The right care, in the right locations

Better connected clinicians can make a direct impact on patients. A range of fully managed O₂ smartphones and tablets gives front-line workers the flexibility and responsiveness they need to provide patient care in the right location, at home or in the community. It's good for patients, reducing stress and improving outcomes.

It lowers costs and overheads too – you can reduce the number of sites you operate, and remove the headaches for your clinicians caused by excessive paperwork. Information in central systems is immediately updated, so your people will always be using the latest information.

Easy to manage

We'll help you to reduce the burden on your IT teams. For example, moving your landline voice services onto your IP networks can significantly reduce your communications management, saving you time and money.

And with one bill, one support number to call, and all your costs reported online through My O₂ Business, you'll spend less time on admin, and have more time to focus on patient care.

Simpler procurement

Our voice and data services are available via PSN Direct Award and we're also part of the Crown Commercial Service's Telephony Services Framework. These frameworks enable you to update your communications, free up budgets to move towards PSN accreditation, and start planning for the future provisioning of digital services.

We hold positions on this new framework on Lots 1 and 2, which cover traditional telephony services and inbound voice services. It means we're ideally suited to supply services to public sector organisations like yours, helping you transform legacy systems to the digital solutions needed today.

Why O₂?

We have a Health practice which is already helping other organisations like yours to drive efficiency and deliver better patient care through technology.

We work closely with you as a partner you can trust. We'll guide you through the changing technology landscape to keep your business up to date and up to speed. With us, it's easy to bring together your mobiles, lines and calls. It'll reduce duplication, admin time and costs. And keep you flexible to adapt easily as you need to.

O₂ Recycle

In the race to stay one step ahead, organisations are often left with large numbers of obsolete devices.

O₂ Recycle provides a cost-effective and sustainable solution that meets all your WEEE recycling requirements. This convenient scheme provides free collection and free data removal. The funds generated by recycled devices can be spent by your organisation or used to fund community projects.

- Free collection
- Best price guarantee
- Fully verified data wipe and certification
- Less waste and a reduced carbon footprint
- 100% of devices are recycled

Don't take our word for it

"It's key to support the clinicians on the ground with accurate, timely information that they can use to make better decisions."

Gus Heafield, Acting Chief Executive, South London and Maudsley NHS Foundation Trust.

"O₂ provided a collaborative approach to delivery and created solutions that were tailored to our approach."

Ricky McKennon, Deputy Director for ICT and Business Development, South London and Maudsley NHS Foundation Trust.

"As a front-line consultant performing community mental health assessments, it's really useful to have clinical information to hand. The technology means I have access to all the information I need to make prompt, informed clinical judgements."

Dr Steve Church, Consultant Psychiatrist, South London and Maudsley NHS Foundation Trust.

See the South London and Maudsley NHS Foundation Trust video case study [here](#).

We'll support you all the way

It's easy to work with us. You get one account team, to support you throughout and provide expert project delivery.

To find out more, call 0800 955 5590 or email us at publicsectorteam@o2.com.
