

# Pop Up Office

Make anywhere your office with your own pop up 4G hotspot

# Create your own portable 4G mobile hotspot. Instantly. The possibilities are endless.

This is a great solution if you have a variety of devices (laptops, tablets, smartphones) and want to hook up to a 4G connection when you're out and about.

Pop Up Office lets you create your own mobile office in minutes.

You can connect up to ten other devices to the internet, email and access all your usual business applications. Because the hotspot is 4G-ready, the devices can use our 4G network whether they're 4G-compatible or not.

The 4G mobile hotspot (also known as a mobile wifi device) is small and lightweight, so you can take it with you, wherever you go. It's also simple to set up and use.

## Where and when can it be used?

- Temporary shops, offices and other premises
- Trade shows, exhibitions and events
- Working on a customer or supplier's premises – where there's no guest wifi
- Construction sites
- While you're waiting for your fixed infrastructure to be installed
- As a fixed back-up solution - delivering resilience.

## How much does it cost?

Inclusive data	1GB	3GB	8GB	20GB
Monthly subscription 24-month contract Pop Up Office device included	£9	£13	£16	£25
Monthly subscription 30-day rolling contract (sim only) Pop Up Office device cost: £73.99	£9.50	£13.50	£17	£27
Out-of-bundle rates	Uncapped. Date overage charged at 2.5p per MB. Extra bundles of data cost £5 for 500MB, £8.33 for 1GB and £12.50 for 2GB			

## Supporting you

Your monthly data allowance is reset on your bill date. We'll send an alert to your device when you've used 80% and 100% of your data bundle. If you choose the 30-day rolling contract, you'll pay for the device.

The Pop Up Office hotspot screen will show you how much battery you have left, your signal and how much data you're using.

# How could Pop Up Office work for you?

## Professional services

A specialist legal team is working on a project at a client's offices, using a 4G mobile hotspot. They can work together as easily as they can at their own offices. 4G gives fast access to any resources they need from their corporate network. It also supports video conferencing, for face-to-face discussions with other specialists when needed.

## Construction

Connect laptops, tablets and smartphones at temporary on-site premises. No need to wait for fixed lines to be installed to get fast data connectivity.

## Retail

Retailers can use a 4G mobile hotspot to connect their EPOS and card processing system. Use it as a back-up to their fixed line. Or use it at national shows and festivals to take card payments and run interactive tablet displays.
